CLOSEOUT MEMORANDUM

Case Number: A12030016

Page 1 of 1

This case concerns NSF employee, [REDACTED]. It was brought to our attention that [REDACTED] may be sleeping in his vehicle during work hours and falsifying his actual work time.

On March 7, 2012, while conducting other official business, OIG staff observed [REDACTED] walking to a parked vehicle on the P4 level of the parking garage in Stafford I at approximately 6:52 am. He remained in the vehicle for over an hour and a half.

We reviewed [REDACTED] ITAS records, timecards and security access records for the period January 27, 2012 - March 23, 2012. During this 58-day period, [REDACTED] ITAS records indicate that his official sign-in time was typically between 7:00 and 7:30 am.¹ On 25 occasions during this period, [REDACTED] security access usage was consistent with what we observed on March 7, 2012: he entered Stafford I from the I-P4 parking garage between 7:00 and 7:30 am and then entered again through the same entrance an hour or two later.² Most of the entries were from parking level 4 through the turnstile to the south elevator banks (P4S Elevator Turnstile).

On July 6, 2012, we referred this matter to [REDACTED] supervisor ([REDACTED]) so that she could determine what occurred and what action to taken. We asked that she let OIG/AIGI know what action she ultimately plans to take.

[REDACTED] provided a written response on July 27, 2012. She indicated that she reviewed our report and met with [REDACTED] on July 9, 2012. They discussed our report and their discussion stressed the importance of accurate reporting of hours worked. [REDACTED] understood and reiterated his commitment to accurately reporting his work time. In addition, on July 18, 2012, their Division Director included a general discussion of the importance of accurate time reporting at their all-hands meeting.

No further action will be taken.

¹ On one occasion, February 15, 2012, a Wednesday, his official sign-in time was 7:00 am while the actual clock time when he signed in was 1:23 am.

² Security access records show employee entrances to the building using the government ID card; they do not show exits.
