RE: Resolution of Case

On May 17, 1996, Dr. [REDACTED] University of [REDACTED] contacted our office and alleged that her institution had mischarged her NSF grant, [REDACTED] and had subsequently refused to correct the charge.

Our office conducted interviews with university auditors and determined that the university had, in fact, mischarged the grant. The university agreed to correct these charges and, on June 19, 1996, credited [REDACTED] grant with \$8,445.41. The university also provided our office with documentation showing the correction and a letter stating that it had reviewed its' internal financial control system and would monitor its' future transactions more closely.

This case is closed.
