Subject: Resolution of Allegations

On 17 March 1997 [REDACTED] contacted OIG regarding documentation suggesting that an NSF SBIR PI was employed by two different companies [REDACTED] and [REDACTED] operating out of the same address. After examining the companies' grant files and after interviewing the PI and the companies' owners, we determined that the companies were owned and operated by the same individuals, and that the companies were not engaged in fraudulent or other improper activity. For this reason, this case is closed.
