CLOSEOUT MEMORANDUM

Case Number: I-22-0024-O

Page 1 of 1

We received an allegation that a reviewer violated the confidentiality of NSF's merit review process when the reviewer told the PI she reviewed his proposal, the panel recommended it would be funded, and the program officer should be reaching out to him soon.

We reviewed the information and determined the reviewer was referencing a proposal submitted to a foreign funding organization, not NSF. Accordingly, we do not have jurisdiction over this allegation. This case is **closed** with no further action taken.
